Microneedling

Skin Pen Microneedling

- Uses ultra fine needles to stimulate skin cell, collagen & elastic tissue production
- Used for acne scarring, fine lines & wrinkles, large pores, & photo rejuvenation
- Down time: 1-2 days

\$300 without PRP-----\$400 with PRP
Additional \$100 for jaw & neck

Pixel:8 Radio Frequency Microneedling

- In addition to fine needles, RF uses heat that can help to tighten the skin of the face, neck and body
- Can stimulate collagen production, reduce the appearance of fine lines & wrinkles, reduce the appearance of scars, improving skin texture & photo rejuvenation
- Downtime: 1-2 days
- Recommend a series of 3 treatments done 4 weeks apart

Can use with PRP for an extra \$100

Can be done with laser resurfacing at the same visit for an additional cost

\$600 (additional \$100 for neck & \$100 for chest)

These services are ONLY offered at our Cosmetic Clinic

Results vary based on color of hair

These services are ONLY offered at our Cosmetic Clinic

Laser & Light

Resurfacing Laser (Erbium:Yag)

- For tighter, brighter skin
- Targets water in the top layer of skin causing peeling of the skin
- Treats hyperpigmentation, fine lines, collagen stimulation/sagging skin, photoaging
- Fully ablative (more concentrated coverage/deeper penetration, more downtime) VS.
- Fractional (not quite as deep, less downtime)
- Down time: 5-7 days, peeling usually starts on day 2 or 3

Recommend multiple treatments for improved results

Can be done with Pixel:8 treatments during the same visit for an additional cost

\$700 (additional \$100 for neck & \$100 for chest)

Vascular & Pigment Laser (Nd:Yag & KTP)

- Treatment of Rosacea, spider veins, cherry angiomas, telangiectasias, solar lentigo
- Downtime: 1-2 days, may have swelling or bruising

Additional laser treatments may be available such as small tattoo removal and scar treatment upon consultation

Prices vary from \$75 (spot treatment) to \$400 (face/chest)

These services are ONLY offered at our Cosmetic Clinic

Injectables & Fillers

- Blocks nerve signals that tell muscles to contract
